

Xinyu (Sherly) Tuo

(917) 207-4473 | xt2324@columbia.edu | New York, NY, USA | [Personal Website](#)

Education

Columbia University, School of International and Public Affairs (SIPA)

Sep 2025 – Jun 2027

Master's Degree, Data Science (Concentration); International Economics and Finance (Specialization)

GPA: 3.80/4.00

- School role: Program Assistant; Coursework: Applied Machine Learning (Python), Banking and Financial Technology

Beijing Foreign Studies University, School of International Relations and Diplomacy

Sep 2020 – Jun 2024

Bachelor's Degree, Diplomacy

GPA: 3.75/4.00

- Ranked 1/84 (2022); Beijing Outstanding Graduate; University First-Class Scholarship; Beijing 2022 Winter Olympics Volunteer

Work Experience

60 Decibels

New York, USA

AI Data Systems Intern

Jun 2026 – Present

Background: Global impact measurement and data company; selected as a first-year master's student for a role scoped for MBAs with 5+ years' experience. Built scalable AI research capability for an impact-investing database powering the client-facing [ecosystem map](#).

- Database from 0 to 1:** Built a multi-agent research workflow (Claude API, Playwright; 20 parallel agents/batch, 35 reusable templates); grew company profiles 1,000 → 11,700+ and investor profiles 0 → 2,200+, plus 140,000+ cited data points for the ecosystem map.
- Data quality control:** Set a mandatory “source + evidence + confidence” citation rule, auto-rejected uncited or entity-mismatched entries, plus a blind-test set with manual spot checks; drove 13,000+ field fixes across 7,000+ records, raising audit accuracy 71.0% → 92.5%.
- Investment relationship graph:** Built a graph of ~20,000 investor–company links, now the ecosystem map's core data layer.
- Workflow productization:** Packaged the agents, research templates, and validation rules into a standardized workflow that reproduces the same output quality from a few prompts, turning individual research delivery into a reusable, automated system.

PingAI

New York, USA

AI Product Intern

Apr 2026 – Present

Background: Gen Z AI agent product helping users find and secure time-limited opportunities; raised \$3M; reported to the founder.

- Supported the product pivot:** Across three iterations (gamified fintech → AI recommender → scarce-resource hunt), tested as an alpha user, validated needs via interviews, and worked through the “retention logic after a failed bet” with the founder, an anchor for the pivot to recommendations; since then pitched features as AI-built interactive prototypes and wireframes rather than documents.
- User research and data-driven validation:** Expanded interviews from friends to diverse target users (including former Bain and McKinsey consultants), ranking feature preferences from 4 in-depth interviews; used Python to scrape and verify that hunt-type supply exists and parsed location data to validate personas, providing early user-preference and supply-side evidence for the current product mainline.

DiDi

Beijing, China

International Product Intern

Jul 2023 – Nov 2023

- Launched the price pop-up feature:** Designed a tiered price display and event-tracking plan for surge-sensitive Latin American riders who cancel mid-wait, with surge-period cancellation rate as North Star metric; cancellations fell ~6% post-launch, guiding iterations.
- Localized the AnyCar (multi-vehicle-type selection) feature:** Matched Latin American mobility needs with supply-side capacity, coordinating R&D, overseas ops, and supply chain teams on localization strategy and version selection; launch lifted order fulfillment ~10%.
- A/B tested driver-defined dispatch zones:** To address drivers' low cross-zone order acceptance and slow capacity response, designed the “custom dispatch zone” A/B test and evaluated it with R&D; treatment-group acceptance rose ~8%, supporting full rollout.

“Miao Miao Xiu” Traditional Intangible Cultural Heritage Team

Beijing, China

Founder & Product Lead

May 2021 – Jun 2024

- 0→1 product launch:** Built a 10-person cross-functional team (design, supply chain, sales) and led 5 intangible-cultural-heritage products end-to-end (requirements, iteration, channels); hit ~20% gross margin via supplier negotiation and cost control; sold 2,000+ units.
- IP partnerships and growth:** Signed IP deals with Peking University and BFSU, reaching 10,000+ users at anniversary events (RMB 10,000+ in one day); held a 3,000+-visitor exhibition; won national/provincial awards; covered by People's Daily and China News Service.

Project Experience

ICHI — AI I Ching Divination App | Computer Vision & Natural Language Processing

Apr 2026 – Jun 2026

- Built a bilingual AI app from Figma mockup to launch, with MediaPipe gesture recognition and NLP for live camera interaction.
- Used AI tools to accelerate full-stack development; delivered personalized hexagram interpretations, a structured Eight Trigrams (Bagua) database, and user-feedback collection for continuous model iteration ([App link](#)).

Skills, Certifications & Other

- Languages: English (fluent / working language; TEM-8; IELTS 7.5), Mandarin Chinese (native)
- Skills: Python, SQL, R, Figma, Claude Code, Codex
